

# CONNECT 31

• • •

If 2020 has shown us anything, it is to highlight the need for Australia to think outside the box to provide the best in COVID safe event solutions.

An important aim in 2021 is to ensure inclusive positive mental health benefits are at the forefront in the planning of community activities and events.

So, the question is, how to provide a COVID safe solution so communities may bring a normality to key events for 2021 and the new normal for future years?

Government recommendations advise us to use the great outdoors for gatherings and events. Why not take advantage of Australia's excellent weather and utilise a Stage system designed for exterior and interior use?

We work with all Australian organisations to provide our unique "Made In Australia" Portable Stage and Access Ramp [solutions](#) to successfully elevate all Australian events.

# ASK YOURSELF THIS QUESTION;

In which country is your event Stage system manufactured?

Aside from COVID-19 affecting all events and performances, 2020 saw the resulting trade war spark a real movement by Australians to look more closely into where their purchases are manufactured and to where their hard earned dollars are going.

Unfortunately, the majority of Staging systems sold here in Australia are premade to a basic design formula overseas.

All we say to you, is "Ask where your event or performance Stage is made".  
If you are of the same mind and want to support "[Made In Australia](#)" event Stages then look no further.

Select Staging Concepts are unique in providing all Australian industries with our premier quality "[Made In Australia](#)" and "Australian Owned" certified [portable](#) and [permanent](#) Stage solutions plus a full range of [Stage Accessories](#).

We design and manufacture Stage solutions from simple one person Stages to more intricate multi-functional Stage configurations for multiple event requirements.

Our team work with Architects and Builders to successfully provide the full professional response to all Stage project specifications. Plus all our Stage systems are manufactured to Australian Standards for longevity and safety.

[Contact us](#) for your custom home grown Australian designed and manufactured Stage solution and know you are supporting a true Australian company.

## PRODUCT HIGHLIGHT: QUATTRO

QUATTRO Staging is our premium Staging system – as with all our products, it is manufactured right here in Australia with sustainable [FSC rated Ply timber](#). QUATTRO is the most adaptable and easy to use Portable or Permanent Staging System available on the Australian market today plus has a 10 Year Warranty.

The [QUATTRO Portable Staging System](#) is extensively used by Australian schools, hire & event companies, theatre groups, churches, government departments, social and sports groups, and the hospitality sector – which is testament to QUATTRO'S strength, quality and multi-functional adaptability.

Select Staging Concepts offer a free design and quote service for all QUATTRO requirements – flat stage, tiered seating, catwalks, access ramps or choir risers. This means, no matter the space, style or budget details, we offer a variety of [successful solutions](#).

# ARTS COUNCIL FUNDING TO INDUSTRIES WHO ARE IN NEED;

The Federal Government has a new post – COVID grant system to get live music back on track.

## CUSTOMER FEATURE; BOOLEROO CENTRE DISTRICT SCHOOL

Our Stage systems perform for all sorts of industries all over Australia, and we love it when a customer sends us their event success stories.

[Booleroo Centre District School](#) is a district school inland midway between Port Pirie and Port Augusta in SA which caters to approx. 67 Primary and 120 Secondary school year students.

Over the years this enterprising school has gradually purchased our [DIVA F&R Stage podiums](#) and assorted [Accessories](#) to allow them the creativity of small classroom Stages or a larger multi height school community Stage to suit all event types.

Read on and see what Booleroo's Jane Crawford sent us about the 2020 year end event....

"This year the primary school ran their concert a little differently, so there were not back drops or extra props on stage. Each class presented an item – a dance or a short class play. The stage was high enough for all of the parents to get a good view.

We added drama blocks around the edge so it was just a 400mm drop from the stage to the blocks and then 400mm again to the floor.

The awards were given out from a speaker at the podium.

It was really handy to have the little steps on the side of the stage for the students to use.

We use the short skirt around the front of the stage.

The Secondary component of the school held their presentation night with items from a guest speaker and the school band. It ROCKED!"
