HOW TO ADD ON TO YOUR STAGE:

The Basic Accessories:

1. Klemm-fix Connector -

Insert the Klemm-fix Connector into the Extrusion opening of the two Podiums. When inserting the Klemm-fix Connector ensure it is facing up- TOP is on the top side. On the outside edge of the Stage insert the Klemm-fix fully. Lock the Klemm-fix Connector with the Allen Key Tool - with the Tool already engaged into the Screw Head, use the Tool to push the Klemm-fix into place - don't overtighten.

2. Klemm-fix Tool -

Tightens and directs the Klemm-fix Connector.

3. Wood Block -

To be used on QUATTRO and DIVA Stages Only - Insert the Wood Block into the first Podium Extrusion half way along the Podium long side, and position the second Podium alongside and fit together. The Wood Block is essential to assist with the weight transfer between each Podium

4. Modular Steps -

The Standard Modular Steps are 950mm wide x 250mm deep and a choice of 150mm and 200mm high. Custom sizes are also available. Modular Steps may be simply slotted/joined together for Stage Heights over 400mm.

Stages with a top height over 1000mm will require a centre Modular Step Support piece to stop sway and bowing.

The Steps are secured to the Stage with a T-Bolt which slides into the Podium Aluminium Extrusion.

Position the T-Bolts on the exterior of the Stage where needed. Slide the Step predrilled hole over the T-Bolt and attach the Hand Wheel - then hand tighten.

The Basic Accessories

5. Modular Step Hand Rails-

May be attached to the Modular Step on one or both sides.

To attach the Step Hand Rail to the Modular Step, remove the Hand Wheel from the T-Bolt where it secures the Step to the Stage. Then remove the plastic cap from the lower vertical Leg of the Step. Remove the Step from the T-Bolt and slide the Hand Rail down into position on to the two connection points on the Step.

Lastly, reposition the Step and Hand Rail over the T-Bolts and resecure with the Hand Wheels.

6. Stage Safety Hand Rails -

For use on any side of the Stage. Must be used for Stages over 1000mm high. Slide the T-Bolts into the Podium Extrusion to the position where the Rails need to be assembled to the Stage. Position the Hand Rails over the T-Bolts. Attach the Hand Wheels and hand tighten. When adding more than One Hand Rail to a Stage use a Rail Clamp to secure the Hand Rails to each other with the Clamp placed mid-way up the upright side.

7. Stage Legs - Standard -

Standard height Stage Legs are available from 200mm high to 2000mm high. Available as sets of 4 or 6 Legs -or as a single Leg purchase. All Legs simply attach to the Podium with the Podium Corner Bracket and Wing Bolt -always hand tighten. All Legs have plastic Feet to minimise scratch issues on timber floors.

8. Stage Legs with Lockable Wheels -

May be used as Drum Risers or moveable Platforms. Simply add the Lockable Wheels and Plates to the standard Stage Legs.

9. Adjustable Height Legs -

Refer to Adjustable Leg Flyer -To be used on QUATTRO and PILOT Modular Stage Systems Only. Available in three Adjusted Lengths -in 50mm increments -400/600mm, 600/1000mm, 1100/1300mm high. Custom Height Adjustable legs are available on request.

Add an Adjustable Height Leg to each Podium Corner Bracket and Hand Tighten. Then slide the Inner Leg to the desired height and click shut to secure. Ensure all 4 Legs are at the same height.

The Adjustable Footer may be simply wound to adjust the Leg height to suit uneven ground.

10. Chair Border Rails -

For use on Stages and Tiered Seating Systems to stop Chair Legs from slipping off the rear of a Stage Tier. Available in 1m or 2m sections. Insert 2 x T-Bolts into the rear Podium Aluminium Extrusion at either end of the Podium. Position the Chair Border Rail on the Stage Podium with the Hinge at the rear. Slide the Chair Border Rail Hinge predrilled hole over the T-Bolt. Attach the Hand Wheel over the T-Bolt and hand tighten.

11. Valance Stage Curtains -

Attach around the Stage on as many Stage sides as preferred. We sew the Loop VELCRO into the Valance at the top - Hook VELCRO is supplied by the metre to match the Valance width - you cut Hook VELCRO into lengths and permanently attach to the top of the Podium Extrusion. The Valance Curtain sections simply peel on and off as required.

12. Embroidered Logos -

Supply us with your Corporate or School Logo artwork file and we will embroider your Logo into the Centre Panel on the Stage Valance Curtain.

The Basic Accessories

13. Storage Trolley Kit -

Refer to Stage Storage Trolley Kit Flyer.

Simply utilise one of the Stage Podiums as the base platform for a Trolley and store up to 20 Stage Podiums and Accessories on the one Podium.

Remove the Stage Legs from one Stage Podium – add the 4 x Heavy Duty Wheels to each Podium Corner Bracket and hand tighten. Turn the Podium over onto the wheels. As you remove each of the Stage Podiums from the Stage, lie it on the Storage Trolley Base upside down, remove the Legs and lie them in the recess of the Podium. Pack away all the Stage (up to 20 Podiums per kit) onto the Trolley and add the Accessories to the top of the last Podium. Slide the Trolley Kit Handle into the Aluminium Extrusion at the narrow end of the bottom Podium – attach the Hand Wheels and hand tighten. Lastly wrap the Trolley Kit Strapping around the Podium and Accessory stack and tighten. Then wheel it away to your Storage Area.

14. Leg Clamps -

Secures groups of Legs together. To be used on large and high Stages; Choir Risers; Tiered Seating; Catwalks. Simply slide around the groups of Stage Legs and hand tighten.

Short 2 Way Leg Clamps – Secures Stage Legs to QUATTRO Curtain Frame Module Legs.

Standard 2 Way Leg Clamps – Secures groups of 2 Stage Legs – Usually on Exterior of Stage/Tiers.

4 Way Leg Clamps – Secures groups of 4 Stage Legs – Usually Interior of Stage/Tiers.

Corner 2 Way Clamps – Secures QUATTRO Curtain Frame Back Stage and Side Drape Modules to each other at the corner joins.

15. Sway Bracing -

To be used to minimise flex and sway in large/high Stage systems; Tiered Seating; Choir Risers; Cat Walks. Ensures long term strength and support. Strong thin Aluminium Tubing in lengths up to 6.5m – may be attached to the Stage Legs to create a cross brace between Legs.

Simply attached to Stage Legs with Sway Brace Clamps at either end and/or where the Bracing crosses a Leg Section
